EDUCATION

FOSTER SCHOOL OF BUSINESS, UNIVERSITY OF WASHINGTON, Seattle, WA June 2026

Master of Business Administration (MBA)

- President of Women in Business Club, Dean's Merit Fellow, Forté Fellow
- Student strategy consultant for RevTech (Software Consulting Firm).

BANASTHALI VIDYAPITH, Tonk, Rajasthan June 2020

Bachelor of Technology, Computer Science

- **Defense Research and Development Organization Independent Study Project:** Designed VR training simulation for combat personnel, translating military stakeholder requirements into technical specs and analyzing performance data to validate improved response times.

EXPERIENCE

ARMADA, Bellevue, Washington June 2025 – September 2025

Technical Program Manager (Intern)

- Orchestrated cross-functional initiative to standardize 10+ KPIs across 12 teams, partnering with leadership to build reporting infrastructure that reduced time-to-insight by 70%.
- Drove initiative to eliminate ADO backlog debt, collaborating with engineering managers to deploy automated grooming solution that increased sprint "Say/Do" ratio from 60% to 85%.
- Strengthened release governance and auditability controls by deploying automated reminders and tracking scripts; ensured 100% adherence to governance standards and reclaimed 120+ hours of annual overhead.

MICROSOFT, Hyderabad, Telangana August 2020 – August 2024

Azure Cloud and AI domain of Global Delivery Centre (GDC)

Technical Consultant (Oct 2023 – Aug 2024)

- Led \$4M service relocation program, coordinating 6 engineering teams through dependency mapping and phased planning to deliver 15% faster with zero downtime.
- Optimized applications for a manufacturing factory using Azure Stack HCI, Arc, and Kubernetes, reducing setup costs by 86% and improving system response time by 13x.
- Accelerated client acquisition in Poland by automating Azure pricing models within the technical sales workflow, reducing proposal turnaround time by 66%.

Associate Consultant - II (Feb 2022 – Sept 2023)

- Delivered productization of PoC findings across pre-sales, engineering, and delivery, creating standardized offering that secured 5 enterprise deals, generated 19,000 billable hours, and reduced downtime by 40%.
- Reduced organizational project costs by increasing the partner resource mix by 15%, utilizing data-driven analysis of project scope and demand forecasting to align delivery capacity with business needs.
- Engineered an automated Azure Landing Zone engine using Bicep and YAML to trigger deployments from Excel inputs, cutting manual configuration effort by 38% and allowing non-technical teams to independently launch governed cloud environments.

Associate Consultant - I (Aug 2020 – Jan 2022)

- Achieved a 60% Azure conversion rate across 10 customer assessments by providing technical discovery and migration insights.
- Devised a new VM relocation strategy that reduced downtime to less than 10 minutes, improving migration efficiency and enabling seamless cross-tenant transitions.

SKILLS AND ACTIVITIES

- **Product & Program Management:** Product Roadmap Development, Release Management, Dependency Mapping, Product (SDLC) & Program Lifecycle, OKRs, Capacity Planning, Stakeholder Alignment, Agile/Scrum.
- **Cloud & Infrastructure (Azure):** Cloud Architecture (AZ-305/304), Infrastructure as Code (Bicep, Terraform), Hybrid Cloud (Arc, Stack HCI), Kubernetes (AKS), Azure DevOps (CI/CD)
- **Data & Automation:** Data-Driven Decision Making, SQL, Power BI, PowerShell Scripting, Power Automate.

**Available for full-time opportunities beginning June 2026*
